FUNCTIONAL ANALYSIS SCREENING TOOL (FAST)		
Client: Behavior Problem:	<u> </u>	_
Informant: Date:		-
To the Interviewer: The FAST is designed to identify a number of factors that may influence the occurrence of beha It should be used only as an initial screening tool and as part of a comprehensive functional analysis of the behavior FAST should be administered to several individuals who interact with the client frequently. Results should then basis for conducting direct observations in several different contexts to verify likely behavioral functions, clarifunctions, and identify other relevant factors that may not have been included in this instrument.	vior pr proble be use	an. The
To the Informant: After completing the section on "Informant-Client Relationship," read each of the numbered items statement accurately describes the person's target behavior problem, circle "Yes." If not, circle "No." If the target prof either self-injurious behavior (SIB) or "repetitive stereotyped mannerisms," begin with Part I. However, if the prof aggression or some other form of socially disruptive behavior, such as property destruction or tantrums, complete	oblem	consists
INFORMANT-CLIENT RELATIONSHIP		
Indicate your relationship to the person:ParentTeacher/InstructorTherapistResidential	Staff	
How long have you known the person?YearsMonths		
Do you interact with the person on a daily basis?YesNo If "Yes," how many hours per day? If "No," how many days per week?		
In what situations do you typically observe the person? (mark all that apply) Self-care routines Academic skills training Meals When the person has Leisure activities Work or vocational training Evenings Other:		g to do
Have you ever observed the person at length in an attempt to identify "causes" for the behavior?YesNo)	
PART I. SOCIAL INFLUENCES ON BEHAVIOR		
1. The behavior usually occurs in your presence or in the presence of other persons.	YES	NO
2. The behavior usually occurs soon after you or others interact with the person in some way, such as delivering an instruction or reprimand, walking away from (ignoring) the person, taking away a "preferred" item, fequiring the person to change activities, talking to someone else in the person's presence, etc.	YES	NO
3. The behavior often is accompanied by other "emotional" responses, such as yelling or crying.	YES	МО
Complete Part II if you answered "Yes" to Items 1, 2, or 3. Skip Part II if you answered "No" to all three items	in Par	t I.
PART II. SOCIAL REINFORCEMENT		
4. The behavior often occurs when the person has not received much attention.	YES	МО
5. When the behavior occurs, you or others usually respond by interacting with the person in some way (e.g., comforting statements, verbal correction or reprimand, response blocking, redirection).	YES	NO
6. The person often engages in other annoying behaviors that produce attention.	YES	МО
7. The person frequently approaches you (or others) and/or initiates social interaction.	YES	МО
8. The behavior rarely occurs when you give the person lots of attention.	YES	МО
9. The behavior often occurs when you take a particular item away from the person or when you terminate a preferred leisure activity. (If "Yes, identify:)	YES	NO

210.	The behavior often occurs when you inform the person that (s)he cannot have a certain item or cannot engage in a particular activity. (If "Yes," identify:)	YES	NO					
11.	When the behavior occurs, you often respond by giving the person a specific item, such as a favorite toy, food, or some other item. (If "Yes," identify:)							
12.	. The person often engages in other annoying behaviors that produce access to preferred items or activities.							
13.	The behavior rarely occurs when you give the person free access to his or her favorite items or activities.							
14.	The behavior often occurs during training activities or when you place other types of demands on the person. (If "Yes," identify the activities:self-careacademicworkother)							
15.	The person often is noncompliant during training activities or when asked to complete tasks.							
16.	The behavior often occurs when the immediate environment is very noisy or crowded.							
17.	When the behavior occurs, you often respond by giving the person a brief "break" from an ongoing task.							
18.	. The behavior rarely occurs when you place few demands on the person or when you leave the person alone.							
PAR	T III. NONSOCIAL (AUTOMATIC) REINFORCEMENT							
19.	The behavior occurs frequently when the person is alone or unoccupied.	YES	NO					
20.	20. The behavior occurs at relatively high rates regardless of what is going on in the person's immediate surrounding environment.							
21.	1. The person seems to have few known reinforcers or rarely engages in appropriate object manipulation or "play" behavior.							
22.	The person is generally unresponsive to social stimulation.	YES	NO					
23.	The person often engages in repetitive, stereotyped behaviors, such as body rocking, hand or finger waving, object twirling or mouthing, etc.							
24.	When the person engages in the behavior, you and others usually respond by doing nothing (i.e., you never or rarely attend to the behavior).	YES	NO					
25.	. The behavior seems to occur in cycles. During a "high" cycle, the behavior occurs frequently and is extremely difficult to interrupt. During a "low" cycle, the behavior rarely occurs.							
26.	The behavior seems to occur more often when the person is ill.							
27.	7. The person has a history of recurrent illness (e.g., ear or sinus infections, allergies, dermatitis).
